

Take 5 Audio

In-Store Music Event

Saturday April 1st 2017 2pm-5pm

Eric Pheils, Zanden Audio

Gary Dayton, Bryston Ltd

Listening, technical insights, and design development.

Please join us at Take 5 Audio on Saturday April 1st, 2017, from 2pm-5pm, for special music presentation from two outstanding audio companies: Zanden Audio and Bryston Ltd.

Refreshments served, and a special discount coupon for all attendees.

Zanden Audio is a Japanese manufacturer of tube electronics well known for their musicality. Combining advanced technology with traditional craftsmanship, Zanden products are both aesthetically and sonically distinctive. Join us for a demonstration of their Modern Series of electronics, including the model 8120 stereo amplifier, 3100 preamplifier and 120 phono stage. Zanden Audio's North American distributor, Eric Pheils, will be on hand for listening demonstrations and to discuss what makes a Zanden product truly unique. Guests are encouraged to bring their own LP records and experience the improvement possible from a Zanden system.

Bryston is a Canadian manufacturer who believes strongly in the quest towards both measured and audible excellence in every product they build -- that accuracy in playback equipment is the true window into the recording artist's emotions. As Vice President of US Sales for Bryston, Gary is eager to use his technical expertise for Bryston's fine equipment, and to share his musical passion with customers and help them rediscover their own. A full Bryston system will be on display, including the newest BDA-3 DAC and BCD-3 CD player.

Our events are relaxed and informative, so spend an hour or two or three with some of the finest audio components in the world - and two of the nicest and most experienced gentlemen in audio.
